

MOHIT ANAND

Frontend Focused - Full-Stack Developer

Email: anandmohit744@gmail.com | Phone: [8521227434](tel:8521227434) | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

A dedicated Frontend-focused Full-Stack Developer with strong experience in React.js, Tailwind CSS, and TypeScript, along with backend development using Node.js, Express.js, and MySQL. Experienced in API integration, authentication flows, cloud uploads, and building scalable applications with clean architecture and modern UI/UX practices.

TECHNICAL SKILLS

Frontend Technologies : HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Vite

UI Frameworks & Styling : Tailwind CSS, Bootstrap, Material UI, Responsive Web Design, Accessibility (WCAG)

State Management : Redux

Backend Technologies : Node.js, Express.js

API & Integration : REST APIs, API Integration, JWT Authentication, OAuth, CORS Configuration

Databases : MongoDB, MySQL, Database Design, Database Migrations

Authentication & Security : JWT & Auth Flow, OAuth Authentication, Password Hashing, Cookie Management

Dev Tools & Platforms : Git, GitHub, Figma, Environment Variables (.env), Code Review

Deployment & Hosting : Vercel, Netlify, Hostinger, GoDaddy, Deployment Pipelines

Performance & Optimization : Performance Optimization, Code Optimization, SEO

Cloud & Media Services : Cloudinary, File Uploads, Email Services

Collaboration & Workflow : Agile / Team Collaboration, Team Work

EXPERIENCE

WeboConnect Technologies

Location: New Delhi, Delhi India

Role: Frontend Developer

Working Mode: Remote

Total Duration: 1 Year

Frontend Developer Intern (Internship)

Started as a Frontend Developer Intern, building responsive UI components, improving existing pages, and learning real-world development workflows.

Aug 2024 – Nov 2024

Duration: 3 Months

Frontend Developer Intern (Extended) (Internship)

Internship extended based on performance. Contributed to major features, optimized performance, and worked closely with senior developers to solve production-level problems.

Nov 2024 – Feb 2025

Duration: 3 Months

Frontend Developer (Full Time)

Promoted to Full-Time Frontend Developer. Built scalable modules, implemented reusable components, improved page performance, and delivered key production features in collaboration with design and backend teams.

Feb 2025 – Aug 2025

Duration: 6 Months

BazaarNXT

Location: Bangalore, Karnataka India

Role: Frontend Developer

Working Mode: Remote

Total Duration: 3 Months

Frontend Developer (Internship)

Worked as a Frontend Developer Intern, gaining hands-on experience by contributing to responsive web applications, implementing UI components using React.js and Tailwind CSS, and integrating APIs. This internship strengthened real-world development skills and provided exposure to production-ready workflows.

May 2023 – Aug 2023

PROJECTS

NextChapter – Full-Stack Ecommerce Bookstore (In Progress) - [[LIVE](#)]

Tech Stack: React.js, Vite, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MySQL, JWT, Google OAuth, Cloudinary, Nodemailer

Description:

Building a scalable full-stack e-commerce bookstore with API-first backend architecture designed for future mobile app integration. Implemented secure authentication, modular backend structure, and dynamic frontend with state management and protected routes.

Backend Highlights

- Designed modular REST API architecture using Controllers, Services, Routes, Validators, Middleware, and Utils for clean separation of concerns.
- Implemented authentication system with:
 - Local login using bcrypt + JWT
 - Google OAuth 2.0 login integration
- Built email verification & password reset flows using Nodemailer with token-based validation.
- Developed Orders API, Wishlist API, and Dynamic Books Listing APIs with proper authorization.
- Implemented custom MySQL migration system to manage schema updates.
- Integrated Cloudinary for profile image uploads using Multer and stream uploads.
- Applied server request validation using express-validator and JWT verification middleware.
- Designed backend to be frontend-agnostic, enabling future mobile app consumption of the same APIs.

Frontend Highlights

- Built responsive UI using React + Tailwind CSS + Material UI + Ant Design components.
- Implemented Redux Toolkit for global state management (auth, wishlist, orders, books).
- Integrated APIs using Axios with protected routes and token handling.
- Implemented:
 - Login, Signup, Email Verification Status
 - Forgot Password & Reset Password flows
 - Used React Hook Form for form validation and Framer Motion for animations.
 - Created reusable components: cards, modals, loaders, pagination, filters, quantity selectors, toast notifications.
 - Implemented client-side routing using React Router v7 with role-based protected routes.

Personal Portfolio Website [[Live](#)]

Tech Stack: React, Tailwind CSS

Designed and developed a modern, responsive personal portfolio showcasing projects, skills, and professional experience. Includes project previews, live links, GitHub repositories, and contact information. Future plans include adding backend functionality for sharing notes and resources.
