---

SUMMARY

A dedicated Frontend Developer with hands-on experience in building scalable, responsive web applications using React.js/Next.js, Tailwind CSS, Bootstrap, and TypeScript. Skilled in API integration, performance optimization, reusable UI components, and developing real-world production features. Passionate about modern web technologies, clean UI/UX, and continuous learning.

EXPERIENCE

WeboConnect Technologies
Location: New Delhi, Delhi India

Role: Frontend Developer
Working Mode: Remote
Total Duration: 1 Year

Frontend Developer Intern (Internship)

Aug 2024 – Nov 2024
Duration: 3 Months

Started as a Frontend Developer Intern, building responsive UI components, improving existing pages, and learning real-world development workflows.

Frontend Developer Intern (Extended) (Internship)

Nov 2024 – Feb 2025
Duration: 3 Months

Internship extended based on performance. Contributed to major features, optimized performance, and worked closely with senior developers to solve production-level problems.

Frontend Developer (Full Time)

Feb 2025 – Aug 2025
Duration: 6 Months

Promoted to Full-Time Frontend Developer. Built scalable modules, implemented reusable components, improved page performance, and delivered key production features in collaboration with design and backend teams.

BazaarNXT
Location: Bangalore, Karnataka India

Role: Frontend Developer
Working Mode: Remote
Total Duration: 3 Months

Frontend Developer (Internship)

May 2023 – Aug 2023

Worked as a Frontend Developer Intern, gaining hands-on experience by contributing to responsive web applications, implementing UI components using React.js and Tailwind CSS, and integrating APIs. This internship strengthened real-world development skills and provided exposure to production-ready workflows.

PROJECTS

NextChapter – Full-Stack Ecommerce Bookstore (In Progress)   - [LIVE]

Tech Stack: React, Node.js, Express.js, MySQL, Tailwind CSS, JWT, Google OAuth

Building a full-stack ecommerce bookstore with a modular and scalable architecture. Implemented secure authentication (Local + Google OAuth), database migrations, email verification, and JWT-based authorization. The backend features a clean folder structure with controllers, services, validators, middleware, and database migrations. Frontend built with React, Tailwind, Redux Toolkit, and React Router.

Key Backend Highlights

- Modular Architecture: Config, Controllers, Routes, Middleware, Services, Models, and Utils.
- Authentication:
- Local Auth with bcrypt + JWT
- Google OAuth integration
- Email verification & password reset (Nodemailer)
- Database: MySQL with custom migration system (add/reset tokens, email verified, phone, profile picture).
- Cloudinary Integration: For user profile uploads.
- Services Layer: Auth, Books, Email system, Template engine.
- Middleware: Token validation, request validation (express-validator).
- Clean Separation of Concerns: Controllers only handle logic; Services manage heavy operations; Utils handle formatting and common helpers.

Frontend Highlights

- React + Tailwind UI with modern components
- State management using Redux Toolkit
- API integration with Axios
- Form handling using React Hook Form
- Animations using Framer Motion
- Reusable components, protected routes, and toast notifications

Personal Portfolio Website [Live]

Tech Stack: React, Tailwind CSS

Designed and developed a modern, responsive personal portfolio showcasing projects, skills, and professional experience. Includes project previews, live links, GitHub repositories, and contact information. Future plans include adding backend functionality for sharing notes and resources.

INTERESTS

Exploring emerging tech innovations, AI tools, UI/UX design trends, traveling, and sharing knowledge with peers.
